ROTARY & BOX MOTION MODELS

FW-3200 SERIES HORIZONTAL FLOW WRAPPERS

The new Fuji-Formost FW-3200 Flow Wrappers are user friendly and easy to operate. The wrappers feature a touch panel control screen and the controller stores product data to assure exact machine settings for easily repeatable product setup. Models are available with either rotary end seal or box motion end seal configuration.

FUJIFORMOST

Standard Features

User Friendly

Servo motor and timing belt mechanism reduces maintenance costs.

Easy Operation

Open top adjustable former enables easier film threading and product size changeover.

User friendly touch panel operation.

Digital data from the controller assures exact machine settings and operation.

Hygienic

New cantilevered frame design allows product crumbs to fall through the wrapper.

Hygienic stainless steel covers are standard.

Optional Features

Packless function

When no product is present, no package is made.

Automation, Integration

Automated feed systems and full line integration capabilities.

Cutless Function

When product is sensed out of time at the end sealers, the sealers are stopped in the open position and remain open until the product is clear and no jam occurs.
