

FORMOST FUJI

PACE-O-WHEEL INFEED SYSTEM

Quality is "First and Formost"

HIGH-SPEED OPERATION

POSITIVE PRODUCT CONTROL

LABOR SAVINGS

PROVEN PERFORMANCE

Automatic Rotary Product Indexer

The Formost Pace-O-Wheel (POW) system is a high-speed continuous motion rotary indexer and wrapper system. It is capable of continuously feeding individual products from an accumulated line. The POW accumulation conveyor smooths out surges in the product flow rate and the indexer times and transfers product into the flights of the wrapper.

The system handles square, rectangular and round products gently and smoothly.
